# The Supp-Le-Milk® - Principle: So Easy – So Ingenious

Only  
Supp-Le-Milk  
replaces the  
Foster Sow

The SUPP-LE-MILK-System shows you a completely new way to get a grip on large litters, starve-out piglets, stressed sows and high costs. Even more: SUPP-LE-MILK is not only incredibly easy and effective – but it also offers many additional benefits.

## Revolutionary Solution

Supp-Le-Milk is different: No foster sows, no transferring, and no stressed out sows. Supp-Le-Milk is for where the problem arises and brings the garbled, natural feeding system back into balance.

Supp-Le-Milk strengthens the deprived piglets and starts a natural process that allows the sow to produce sufficient milk. That means more uniform litters, improved survival and healthy sows.

## Revolutionary Milk

Supp-Le-Milk is high-performing milk effective in every way. It is specific to the Supp-Le-Milk-System and is adapted from the first days and approved by the piglets.

Supp-Le-Milk helps all the newborn piglets get what they need - From the first day until weaning!

**Health** Contains high-quality milk protein and digestible fat

**Improves digestion** Acidified to help ensure freshness and to increase digestive enzyme activity

**Improves growth** Enriched with Amino acids, Vitamins and Minerals to support/enable optimum growth

**Cost – Effective** the attractive price and minimal amount consumed allows you to feed Supp-Le-Milk to weaning and achieve a high return on investment.

Ingenious: The Supp-Le-Milk-System brings the Milk to exactly where it is needed!

New  
Thinking in  
Pig Breeding

Udder-Health-Management as the Basis

# Supp-Le-Milk<sup>®</sup> Spiral of Success:

Minimal Investment – Sensational Results: Supp-Le-Milk is the initial spark which strengthens both piglets and sows. Now the entire litter can release its tremendous potential.

## Stunning Advantages

### No Foster Sows Necessary

**Piglets remain with the sow!**

Supp-Le-Milk comes to where it is needed: Manually or by Supp-Le-Milk milk cups directly in the crates. So smaller and deprived piglets get help and remain with the sow.

### Uniform Piglets

**Homogeneous litters**

The piglets of a litter remain together and Supp-Le-Milk supplies the additional opportunity for uniform development.

### Improved Survival

The Supp-Le-Milk-System provides an additional drinking space directly with the sow – so all pigs are perfectly strengthened, and the survival rate clearly climbs.

### Increased Weaning Weights

The uniform development of the piglets through Supp-Le-Milk provides simultaneously for an above average consumption of milk out of the teats of the sow – which encourages an optimal growth of the piglets.

### Strong Sows

**Less stress, more milk production, better sow condition**

Supp-Le-Milk strengthens the sow. The teats are frequented not only of few strong, but rather all the piglets of the litter, what leads to an increased production of milk, less desolation and an optimal utilization of the sows milk.

**You get more milk out of your sows, you save feed costs and at the same time wean more and heavier piglets.**

### Saves Time (up to 4 ways)

The Supp-le-Milk System with its practical cups is **1. Quick to install, 2. Needs little attention, 3. Leads to faster growth 4. Maximizes productive sow days / Sows are ready to use in a shorter period.**

### Saves Feed

**Supp-Le-Milk saves on Supp-Le-Milk**

The longer you feed with Supp-Le-Milk the less of it – in relation to the weight increase of the piglets is consumed. Supp-Le-Milk makes the piglets grow quickly.

### Saves Farrowing Spaces

The Supp-Le-Milk-System needs no reconstruction and no extra foster sow spaces are necessary.

### Adaptable

**No reconstruction required!**

Whatever the building design or the arrangement of crates, the Supp-Le-Milk-System can be utilized. The flexible and simple feeding system adapts itself in every situation and size.

### Easy Installation

The Supp-Le-Milk-System can be easily installed with normal tools and the simple instruction guide.

### Very Affordable

The complete Supp-Le-Milk-System with its centralized control unit has a low cost price. In addition, this is even more of a bargain acquisition when you consider you save yourself reconstruction costs.

Foster Sows become unnecessary

### Economical and Efficient

From the day of birth until weaning the Supp-Le-Milk System is economically wise.

Up to 80 litters can be supplied from each reservoir. Minimal effort to keep the Milk fresh and the System clean.

Within one year the Supp-Le-Milk System can pay for itself by marketing more pork from existing sow numbers.
